

# Perfect combination

## Onboard power and electric drive system for narrowboats

Fischer Panda combines the best of two systems into a single "hybrid" solution. This system allows 100 % electric cruising using a powerful 20 kw electric shaft motor. Onboard power is supplied by a powerful Fischer Panda generator and suitably-sized battery bank.

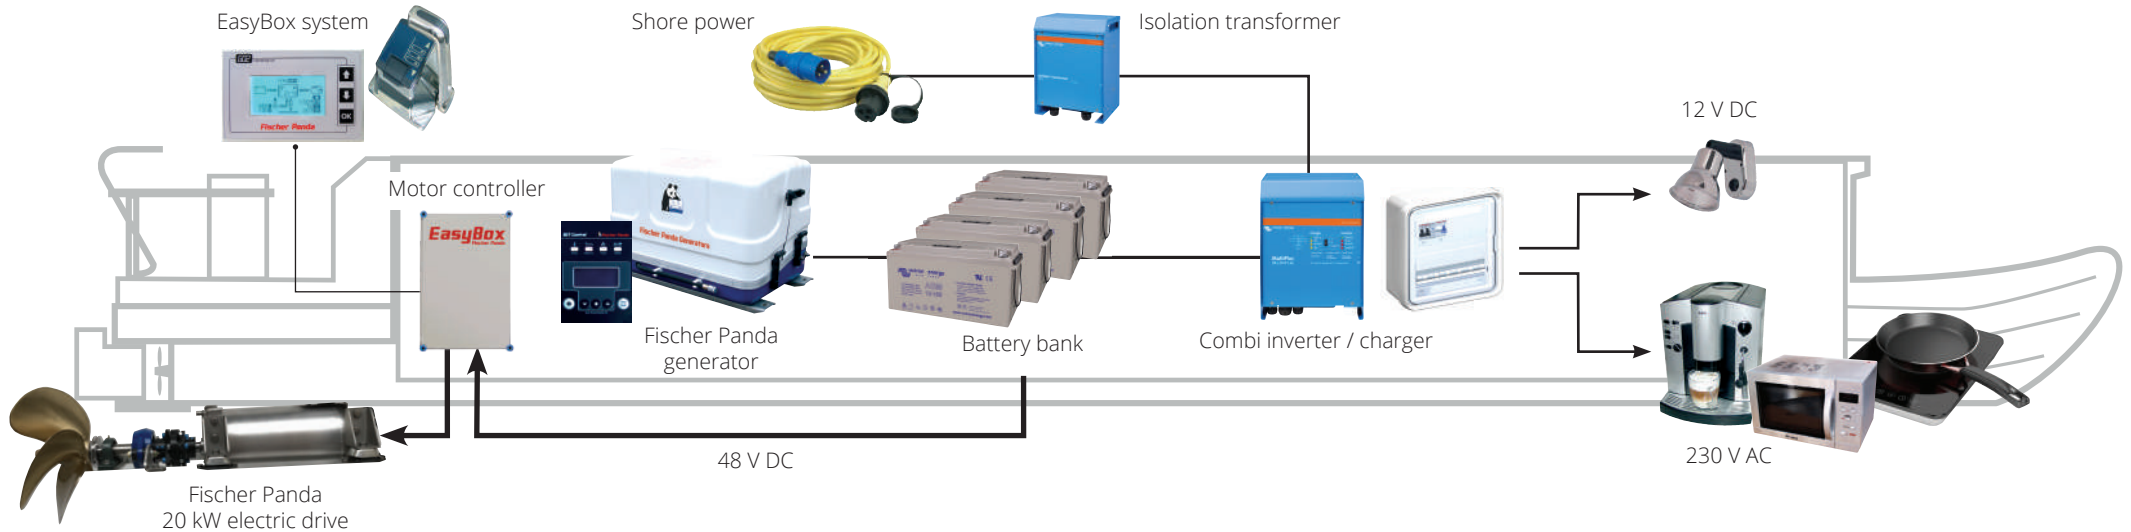

### Fischer Panda drive system

- 100 % electric cruising using battery bank
- Power cruising using generator
- Electric drive is practically maintenance free
- Shorepower for charging

### Fischer Panda power system

- Shorepower when moored
- Power for boat's system components
- 230 V onboard power for electrical appliances
- Power for electric cooking (no gas required!)

Note: components may differ according to customer's system requirements
